

VISCO JET 

Trendsetting agitator technology

VISCO JET[®] column agitator VJ405

VISCO JET® column agitator VJ405

- Ideally suited for agitation or tinting of facade paints and plasters in round, or oval, single vessels from 5-50 litre
- VISCO JET® Pyramide impeller for effective agitation of products from low to high viscosities
- Simple change of mixing elements using the VISCO JET® fast release coupling
- Designed for professional use in continuous operation and in combination with automatic roller conveyor systems
- Secure vessel fixing using pneumatic clamping system with a vacuum gripper or a manual clamping device
- Drip tray prevents contamination of any parts
- Complete covering of the agitator with an aluminium housing meets the highest security and safety requirements
- Working and maintenance access via secured door with window
- Digital control unit with agitator process programming via touch screen

VISCO JET® VJ405

Easy to use for optimal integration into your production process

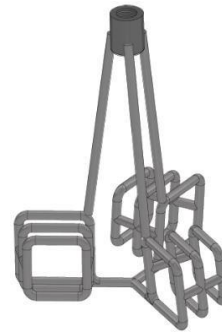

- Vessel is moved into the agitator housing via roller conveyor
- Vessel in operating position
- Locking of the vessel via manual or optionally pneumatic vessel clamping device
- Drip tray swivels to the side
- Selection of agitating program via touch screen or master control
- Start of the agitating process
- Agitating process completed
- Vessel is released, drip tray swivels back

VISCO JET® Pyramide -

We strike the right colour

After a very short time, the VISCO JET® Pyramide impeller, which is specially developed for this application, achieves the optimum tint and viscosity of your mixing medium during the agitating process.

This impeller can be used for tints and colours with viscosities up to 30.000 mPas.

VISCO JET® VJ405

The semi-automatic column agitator for your production process

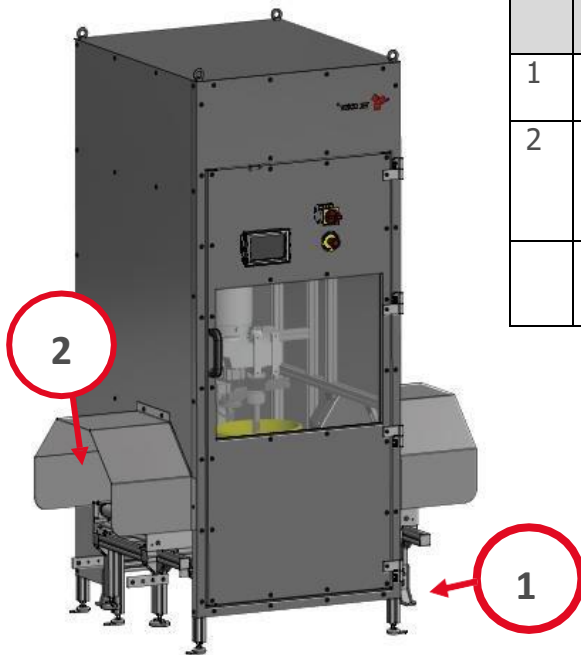

The VISCO JET® VJ405 is available in different versions to fulfil our customers' requirements.
